High School "Lit." Has Merry Time

Close of School Term is Marked by Very Enjoyable Social and Dance on Thursday.

The High School Literary Society held a very enjoyable social and dance on Thursday last in the Oddfellows Hall, in which the teachers of the public schools and the school board joined, on the invitation of the students.

A short address was given by Principal Hoyle, briefly describing the activities of the society, and later in the evening Thos. Johnson, chairman of the board, gave a short address.

At intervals during the evening presentations were made to Miss McKinnon of a pair of silver salt and pepper shakers, a burnt leather tie rack to Principal Hoyle as a mark of good fellowship from the students, on the close of the school term, and farewell and good wishes extended to Miss Catherine Davidson, a student of the high school, on her departure to reside at Alex. Alta. The presentations were made by Adam Wilson on behalf of the students, and hearty applause was given evidencing the goodwill of the gathering.

Mrs. Alterman's orchestra furnished a very enjoyable program of dance music, and special mention is also made of the fine lunch provided by the students.

Special features of the dance program were the balloon dance, which

was won by Leslie Emmerson and Anna Hall, and the broom dance, the prize for which was awarded to H. T. Halliwell, with the accompanying distinction of being made a life-member of the Literary Society.

Principal Hoyle proposed a vote of thanks to the trustees of the hall, to the school trustees and to Mr. Alterman for their assistance, whereby the expenses of the evening were considerably curtailed, which was specially appreciated owing to the society exchequer not being in a very flourishing condition.

The evening marked the close of the school term, consequently everyone enjoyed themselves to the limit without the fear of having to resume studies for at least another two months.

The Literary Society of the high school was organized following the opening of the school term in 1927, at the instigation of Principal Hoyle, whose appointment dated from 1927. The object of the society is to hold a meeting fortnightly, on Friday afternoon, the first part being occupied in business matters and discussing the policy to be followed in athletic and other exercises, the purchase of supplies, etc. The remainder of the time is given over to a program, including musical numbers, the reading of a school paper, and discussion of timely topics of interest to the students, in arranging the program and contributing thereto.

During the school year just closed four socials were held to which were

(Continued on Page Eight)

Historical Record of Coleman Twenty-Four Years Ago

Brief But Interesting Notes Compiled From Minute Book of Town's Energetic Board of Trade in 1904

The International Coal & Coke Co. Ltd. took over the Coleman townsite and coal lands adjacent in the early part of the year 1902. The townsite was surveyed and lots placed on the market in the month of October of the same year. During the remainder of the year officials and workmen practically camped on the townsite or slept at the Blairmore hotels. About Christmas, however, the Coleman Hotel, with its comfortable and ample accommodations, was opened.

At the first of the following year (1904) Mr. E. E. Reynolds arrived from Pennsylvania to take the position of mine superintendent. During the year the town rapidly developed and at its close the population was about 500. Banking and business houses, providing every necessity for civilized life, were in full operation. The first overseer was Mr. H. M. Frapp.

School accommodation being urgently needed, a temporary arrangement was made with the trustees of the Blairmore district, in which Coleman was situated, to open a school in the town. This was done with Miss Nettie McIntyre as the first teacher. The Church of England mission hall, a small building erected in the spring of the year, was used for two months as a school room, but becoming too crowded, the upper floor of the Brenner building was engaged. Coleman School District was officially set apart in March 1905.

The improvements during 1904 included the erection of company offices, bank, managing director's and superintendent's residences, Royal North-west Mounted Police barracks, and a second hotel, while the plant at the mine was practically completed.

The plant included tipples with a daily capacity of 2000 tons, 100 coke ovens, power house 78x80 feet, ware-houses, machine shops, etc. The main tunnel had reached a length of about three-quarters of a mile, number 2 seam about 500 feet, while a shaft had also been sunk a short distance to the east of the main entry.

In the summer a citizens' committee put in a temporary water system, surface pipes conducting the water from a short distance up the creek. This was replaced by the permanent system before the beginning of the winter. The electric light system was put into operation the middle of April 1905, and telephone system about the same time.

The foregoing is taken from the minutes book of Coleman Board of Trade, and apparently the writer of this historical record, whose name is not given, must have either resigned and moved away, or left the subsequent reports of meetings to tell the story of Coleman's further develop-

ment from that time. The first recorded minutes bear date of April 14, 1904, and the following officers were elected:

President, G. M. Frapp; vice-presidents, E. E. Reynolds and D. J. McIntyre; treasurer, Alex. Cameron; secretary, M. C. Davidson; executive committee, E. Walter, H. Ferguson, Pollock, J. C. Reid, E. Disney, R. A. Robinson, F. C. Graham, A. M. Dunham, R. Olsen, Thos. Hardy, W. J. Adcock, Dr. J. Westwood.

The mission hall of the Church of England apparently was the meeting place for some time, and later the first hall were the meeting places. Some of the meetings bear the signature to the minutes of the Rev. R. A. Robinson, and later a Mr. H. A. Parks, who was followed in 1910 by P. R. Webb.

In the minutes of April 5, 1905, it is noted that a committee was appointed to ascertain the possibility of the Canadian Pacific Railway making Coleman a divisional point, and the following meeting records that the secretary read a letter from the district superintendent of the railway company stating that the matter had been deferred for that year. It was then moved by H. H. Galer, seconded by O. W. Benedict, that the secretary write Vice-President Whyte stating the advantages possessed by Coleman and requesting that the company consider this town when selecting a divisional point.

In the minutes of June 2, 1905, the reply of Vice-President Whyte was read, stating that Coleman was only 95 miles from Lethbridge, the divisional point to the east, and the railway was obliged to pay train hands for a minimum run of 100 miles. It was moved by O. W. Benedict, seconded by F. C. Graham, that the secretary acknowledge the letter and emphasize the advantages afforded by Coleman.

The foregoing will give a very good impression of the Board's activities in the early days. There were many important matters concerning the town's welfare and progress discussed, and one item that stands out is the efforts made to have the Soo-Spo-Three rooms of the school take turns Kane flyer, the crack train of the C. P. R. in those days, stop at Coleman. That the town had by this time assumed some importance in the eyes of the railway company is evidenced by the fact that the efforts were successful. Another important event was the entertaining of the members of the Spokane Chamber of Commerce. A glance over the minutes shows that the members of the Board were energetic and ambitious, and the frequency of the meetings denotes that there was a live interest taken in its work.

HOSPITAL NOTES

Mrs. Minchin, of the staff, has gone to Drumheller to spend part of her vacation, and Miss Morrison spent the week-end at Medicine Hat.

John Petroski and Alex. Redoff, who were injured a few weeks ago in the mines, are making steady progress, having been discharged from hospital on Sunday.

Dr. Stewart will leave shortly for a few weeks, a very important event in his life being the reason, of which it is hoped to record particulars later under the heading of hospital notes. During his absence Dr. Green, professor of surgical anatomy at Alberta University, will be here to assist Dr. Borden. Dr. Green was here in 1927 during Dr. Borden's vacation at the coast.

Wm. McCulloch was admitted to hospital to receive treatment for an injury to his eye, caused by rock dust. He works at the International mine.

Mrs. Ferguson was discharged on Saturday, following an operation.

Joe Thoroff, who had been a patient for some time with an injured foot, was discharged on Sunday.

Onnie Hill, who since April 28 has been in the hospital, is progressing and hopes soon to be restored to health.

Several young people were operated on to have their tonsils removed, including Edna and Margaret Hogan, George and Ernest Houghton, and Elsie Crawford.

Mrs. Leon Paikla was discharged from the hospital on June 23, following an operation.

Mrs. Barnes of Blairmore has been here relieving, and Nurse Silverthorne of Calgary arrived on Sunday to relieve during Mrs. Minchin's vacation.

HOW'S THIS FOR A "POMEY"?

People occasionally indulge in mental gymnastics in an effort to write poetry. To most people it almost makes them sweat blood to try and write a few lines that will rhyme, but Harold Houghton, well known locally, and now living in Calgary, sent the few lines below to his father, Chief Houghton, when he heard he had purchased a new car:

P stands for popular—the car you have got.
O stands for Oil to keep it from running hot.
N stands for New, and I guess it's a cock blue.
T stands for Trail and that's blue too.
I stands for Indian, the sign on the front.
A stands for Alex who sold it to you.
C stands for Calgary and Stampeded too.

MARY'S BEST PICTURE

For the week-end the Palace has a special booking of "My Best Girl," in which Mary Pickford, familiarly known to picture fans as "Dor Mary" and "The World's Sweetheart," plays the lead. It is a particularly fine picture, and the fact that Mary is playing the title role should ensure a big attendance.

Watch for date to be announced shortly of Douglas Fairbanks in "The Gaucho."

ST. ALBAN'S CHURCH

Service next Sunday morning will be at 9.30.

Choir practice on Friday evening at 7.30.

The Rev. A. D. Currie, who is at present at Perry Siding, Kootenay Lakes district, is considerably improved and is benefiting from the rest. His parishioners hope to see him back shortly fully restored to health.

Big Features found in no other Low-Priced Six

AMONG the scores of advanced engineering features that contribute to the impressive quality of the New Series Pontiac Six, there are three advancements worthy of special notice . . . three important features found in no other six at Pontiac price.

First, the New Series Pontiac Six offers the smart styling, the luxurious comfort, the rich appointments and the staunch construction of bodies by Fisher.

Second, the New Series Pontiac Six engine embodies the new G.M.E. (General Motors Research) cylinder head, which uses ordinary gasoline to achieve amazing smoothness and silence with economy of operation.

Third, Lovejoy Hydraulic Shock Absorbers, standard equipment on the New Series Pontiac Six, provide an ease of riding that makes the roughest roads seem smooth.

Here are three big features that no buyer of a six in Pontiac's price class can afford to overlook. Even if the New Series Pontiac Six offered no other exclusive advantages, it would still hold its position as the world's finest low-priced six.

Ask your dealer about G.M.E. Deferred Payment Plan which makes buying easy. 733-1-266

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended, and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations—the very country in which the idea originated—came as a rude shock to all lovers and advocates of peace. It discouraged Europe, re-awakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Carta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind;

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hoping that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at ()

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at () and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

"That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation signing this treaty ever again resort to war it would become, as never before, an outlaw among the nations.

Substitutes Cards for Pistol

Affair Of Honor In Czechoslovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czechoslovakia, judging by the method adopted by a business man at Bruenn, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to the 'business man, who challenged him to a duel.

A Wonderful Performance

Recent Flight Over Pacific Was

Great Achievement For Flyers

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The "Southern Cross" winged its way to fame under control of four men, each performing an essential task in making the trip scientifically safe and sane. This feature alone raises the Pacific flight out of the category of regular daredevil stunts and enhances notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robbed the journey of some sensational features beloved of the crowd, but detracted not a bit from the glory won by the fliers. Their accomplishment is the more valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-door exercise. But a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, the must have a blood tonic. Nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich the blood, but they help the appetite and aid digestion, relieve the weary, aching limbs, and bring new health and strength and transforming anemic girls and women into cheery, vigorous ones.

The value of Dr. Williams' Pink Pills in the case of anemic girls is proved by the case of Miss Lily Stoddard, Margareville, N.S., who says: "From the age of 12 to 15, I was in an anemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic and have thus kept in the best of condition."

Every weak girl should promptly follow the advice of Dr. Williams. I was feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail from a couple of boxes of Dr. Williams' Pink Pills at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Show Canadian Films

Views Of Canada To Be Shown In Britain and Central Europe

"Seeing Canada" films, made by Canadian Government, will be shown in from 300 to 500 British theatres this year as well as in Central Europe, says Captain Frank Badgley, M.C., director of the Canadian Government Motion Picture Bureau, upon his return from Great Britain. He expressed his belief that the near future Canada would become an important field for the British Empire pictures.

Eskimo Census Taken

A census of the Eskimo people has just been completed. From the most reliable sources it is estimated that there are 7,103 Eskimos in Canada.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Yesterday is a waste-basket into which lost opportunities are dumped.

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, 601 Lake, Sask., writes: "Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any'

why I wouldn't be without it where there are children? 'My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well as ever.' Put up only by The T. Millburn Co., Limited, Toronto, Ont.

The Sioux Lookout Map Sheet

Where the Miner's Pick Now Displaces the Tomahawk

The Sioux Indians were among the handsmen as well as the most warlike of the aboriginal inhabitants of North America.

Their memory is perpetuated in the Sioux Lookout map sheet of the National Topographic series, now issued from the press of the Topographical Survey of Canada. The new map embraces an area lying 150 miles north from Lake Superior and adjoining the Lac Seul map sheet on the west.

The town of Sioux Lookout gets its name from the precipitous hill overlooking it. From the top of the hill, in days gone by, the Ojibwas would look out and see the smoke of the wigwags and the waterways from raiding Sioux. On one occasion the lookout slept and the Sioux fell upon the camp. They tomahawked the warriors to a man, and destroyed all the houses.

This country with its broken lakes and streams, teeming with fish and chained with rapids and waterfalls, is a tourist's paradise. Here are old fur trading posts like Gunbarry House, founded over a century ago. At historic Lac Seul the chief factor of the Hudson's Bay Company has a four-hole golf course. (Ingress to the region is by way of the Canadian National Railways and thereafter by innumerable connecting waterways with launches, tugs, or canoes.)

This territory is part of the newly emancipated area known as the Great Canadian shield.

The Sioux Lookout map sheet of the National Topographic Series, on the scale of four miles to the inch, may be obtained in sheet form from the Topographical Survey, Department of the Interior, Ottawa, for the nominal fee of 25 cents. If desired in folder form or linen backed the fee is 50 cents.

For Both House and Stable. — There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from the same causes. Dr. Thomas' Eucletic Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

A Great Germ Carrier

Common Housefly Covered With Deadly Disease Germs Says Scientist

The common housefly is literally covered with bacteria and deadly disease germs. Scientists have estimated that many flies carry as many as 6,000,000 germs. This estimate is determined as follows: A fly is placed in a small bottle of water. The bottle of water is then shaken so that the germs will all be washed off the fly, and they will be equally distributed throughout the water. A tiny drop, perhaps a millionth part of the water, is then placed on a glass slide and examined under a powerful microscope. The scientist counts the number of bacteria visible, say, He then multiplies the figure by 1,000,000, since there are about 1,000,000 such drops in the bottle, and his answer is that the fly carried 6,000,000 bacteria.

Manx, the native language of the Isle of Man, is dying out; fewer than 1,000 of the island's 50,000 inhabitants have now any working knowledge of it.

France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market. When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long struggle to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 13,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

All countries for generations have considered France as an importer of coal, they all still try to capture the market there, ignoring the fact that France now mines all she burns. Therefore, the French coal operators are puzzling how to reduce costs; curtail production and restrict imports so coal won't become too cheap.

Railways Arrange New Circle Tour

Convenient Visit To Glacier, Waterton and Jasper Parks Is Made Possible

An arrangement has been completed by the Great Northern and Canadian National Railways to make available to tourists a circle tour of three of the greatest playgrounds in the world. Under it tourists will be able to visit Glacier National Park, Alberta, without loss of time and at a considerable reduction in cost.

The inter-change point between the two companies will be Calgary where passengers for Jasper will take the Canadian National Railways and those for Waterton and Glacier will take Great Northern automobiles. The autos and the trains will make connections and summer tourist fares will apply in both cases. In the past it has only been possible for travellers to combine these places in one visit by making a round-about and expensive trip.

In Glacier and Waterton Parks the Great Northern Railway operates a number of splendid hotels, amusements, which are the Prince of Wales Hotel, the Glacier Park Hotel, and the Many Glaciers Hotel. In Jasper, the Canadian National Railways operates the Jasper Park Lodge, a unique and distinctive summer resort.

Disturbs Asthma. Even a little

speck too small to see will lead to agonies which no words can describe. The work of the breathless tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Find Blue Best Color

Blue is the most effective color to attract policemen at night, according to tests made by city officials in Sheffield, England. The city has just installed in outlying districts booths surrounded by powerful blue lamps, which when lighted by a switch in central office, summon the policemen from their beats to nearby telephones to receive instructions.

Concealed, unthought of, the space between brick and plaster spills health and comfort—the opposite—to the occupants of any home.

In homes where Hercules Permanent Building Paper is behind the outer walls comfort and health are assured. Hercules has been rigidly tested and has proven wind proof and damp proof. Examine Hercules carefully. Prove its qualities for yourself. Ask for samples of the three grades—A, B, and C.

Appleford Paper Products
HAMILTON, CANADA

URGE WHOLESALE SOCIETY TO COVER ALL OF CANADA

Lloydminster, Sask.—By a unanimous vote the congress of the Co-operative Union of Canada in session here, went on record as being of the opinion that the time had arrived for the establishment of a wholesale society covering the whole of Canada. This is set out in a resolution passed which further urged co-operative wholesale societies to attach an official to their Montreal and Winnipeg depots who will assist in the development of the movement in Canada.

Another resolution was approved, providing for the appointment of a committee to investigate the practicability from the view point of economics, of a Canada-wide wholesale society, an organization for the three prairie provinces only, as well as other factors having a direct bearing on the whole question of consumers' co-operation.

All co-operative marketing organizations throughout the Dominion will be issued a definite invitation to affiliate with the Co-operative Union of Canada. The importance of having the Wheat Pools affiliated with the Union was especially emphasized. While the desirability of having all co-operative organizations linked up was stressed by different speakers on the subject, it also developed that the annual membership fee of affiliated bodies would help to solve the financial difficulties of the central office.

The resolution as passed follows: "That the appeal be made to the societies that was made last year in order to increase the efficiency of the Union, and that various co-operative marketing organizations be invited to affiliate with the Union."

One delegate put a motion suggesting that the fee of the wheat pools be placed at one cent per member. This motion however, was never put. One fraternal delegate representing the U.P.C., contended that it appeared that the invitation to the pools to affiliate was for the express purpose of financing the Union.

The only co-operative organization now holding membership in the Union is the United Grain Growers, it was stated by Secretary George Keen as a result of a question asked by J. H. Wesson, a director of Saskatchewan Wheat Pools. Mr. Wesson in reply to a question asked, said he did not think that the fact that the U.G.G. had membership in the Union could be considered an obstacle to the Pools becoming affiliated. He did not, however, give any indication that the pools would join.

A resolution asking enactment of legislation providing administrative machinery to insure furnishing annually, financial and business statistics of co-operative societies in their respective provinces was approved by the congress.

World's Dairy Congress Opens

Forty-Five Countries Represented At Conference In London

London.—Sixteen hundred delegates, representing 45 countries, assembled in London for the World's Dairy Congress under the auspices of the International Federation, whose patron is the King.

Lord Desborough, president of the British Imperial Council of Commerce, presided. Hon. W. H. Motherwell, Canadian Minister of Agriculture, is representing the Dominion, while the delegates also include Lord Lascelles.

The program of work, comprising presentation of technical and scientific papers, etc., and the visits to the dairying centres of England and Scotland.

Celebrates Anniversary

London.—The Duke of Connaught, former Governor-General of Canada, celebrated the sixtieth anniversary of his entry into the army by entertaining the members of the army council. The Duke, who recently observed his 75th birthday, enjoys wonderful health and fulfills a constant series of public and social engagements, although he has eliminated evening engagements.

Receives Promotion

Winnipeg.—Robert Nelson Munroe, assistant division commissioner of immigration for Western Canada, has been promoted to a post in the Dominion office at Ottawa, according to word received.

W. N. U. 1740

Wireworms Damage Saskatchewan Crops

Report Shows Activity Was Unusually Severe This Spring

Regina.—The greatest damage done to Saskatchewan crops this year is by wireworms, according to the recently issued report of the Dominion Entomological Laboratory, Saskatoon, on insect conditions. Much of the damage attributed to wireworms is in reality due to wireworms, it is stated. "Wireworm damage appears to have been unusually severe this spring due to the prevailing dry weather, the use of much unreliable seed grain and the fact that moisture was sufficiently high to enable the wireworms to keep working on much of the seed and particularly the lower part of the stem," says the report. "A certain degree of recovery has been noted as a result of the recent rains, which, however, may tend to lengthen the period of wireworm activity." The forest tent caterpillar infestation now includes an area in the Lloydminster-Malden District and the American tent caterpillar is unusually abundant in Western Saskatchewan.

Wrong Man Executed

Tragic Miscarriage Of Justice Reported From Germany

Berlin.—"We therefore have no doubt that this unfortunate man was condemned to death and executed for a murder of which he was completely innocent."

This is the sensational statement with which Mecklenburg-Strasse Ministry of Justice confesses to a shocked public a miscarriage of justice, which is described by Berlin newspapers as the most terrible in German history within the last 50 years.

The announcement was accompanied by the dramatic disclosure that four men on whose evidence the prisoner had been condemned have been arrested and have confessed that they themselves committed the crime for which this innocent man had suffered death.

Drowned When Car Plunges Into River

Accident Happened When Driver Took Wrong Turn In Fog

Charlottetown, P.E.I.—Three young people, all natives of Elliotville, P.E.I., were drowned, and a fourth narrowly escaped, in a similar fate, when a touring car took a wrong turn in the fog, and plunged into the river, at Southport recently. The deceased and survivors were all brothers and sisters.

George Walsh had driven the car here from New York, and took his brother and sisters out motoring, last night. They lost their sense of direction in the thick fog, and making a wrong turn, plunged over a wharf, into the river.

Search For Lost Continent

Expedition Has Left New York For the Azores

New York.—An expedition in search of traces of the supposedly "lost continent" of Atlantis has sailed for the Azores.

The expedition's ship, named the Atlantis, was designed by Columbus O'Donnell Iselin, 2nd, of New York, captain of the expedition, and is equipped with machinery invented by Iselin, which is expected to dredge the ocean bottom at a depth of three miles.

All Murders Are Solved

London.—Twenty-seven murders were committed in London last year, all of which were solved, according to a report by the Police Commissioner. Twelve persons were charged, ten murderers committed suicide, while one died in an asylum. The value of property stolen was \$2,821,000. Property recovered amounted to \$650,000.

Jews Promise Three Millions

London.—The Jews of the United States were pledged to raise annually a minimum of \$3,000,000 to make up for the next five years the annual budget for the rebuilding of Palestine as a Jewish national home in accordance with the terms of the mandate of the League of Nations entrusted to Great Britain.

May Try Westward Crossing

Paris.—Another Westward crossing of the Atlantic by aeroplane may be attempted early in July. The trans-Atlantic aeroplane of Maurice Drouhin and Joseph Lebriz should be ready before July 4. This flight will be a commercial venture. Lebriz said in a speech at Lyons.

Lord Plumer Vacating Post In Palestine

Has Held Position As Commissioner For Three Years

London.—Field Marshal Lord Plumer will shortly vacate the high command of Palestine, which he has held since 1925. The Daily Express, in an article from its Jerusalem correspondent, says that the retirement will be brought about by Lord Plumer's differences with the British colonial office over the division of the coat of the Trans-Jordanian force as between the British Exchequer and Palestine, Palestine having already a budget deficiency of \$3,000,000.

Lord Plumer commanded the second army during some of the most important operations of the Belgian front in the war, in some of which the Canadian forces took part. He was specially mentioned for good work in connection with railway and forestry battalions. Lord Plumer, who is 71 years old, as a matter of fact, had Canadianians constantly with him during the war and he also commanded men from the Dominions in the South African war.

RESEARCH WORK IN CANADA TO RECEIVE IMPETUS

Ottawa.—Industrial and scientific research work in Canada will receive an impetus as a result of a visit

made to Washington by Hon. James Macdonald, minister of trade and commerce, and Dr. Henry Marshall Tory, president of the national research council of Canada, who have returned to Ottawa. Mr. Macdonald and Dr. Tory obtained a bird's eye view of what is being done in the bureau standards at Washington with the object of introducing the latest methods in Canadian laboratories, to be located in Ottawa, and with the purpose of co-ordinating research efforts throughout the Dominion.

Mr. Macdonald emphasized the fact that it is not the intention of the federal government to duplicate what is being done in the universities or provincial government laboratories in Canada, but rather to secure co-operation and eliminate overlapping. The national research council will assign Nova Scotia problems to the scientists of that province and to the experts of other provinces will be given the problems peculiar to their particular district. Financial aid will be given to scientists working in the various universities.

Plans for the new Canadian laboratory to be established on a ten acre site at the Dominion Experimental Farm, at Ottawa, are now in course of preparation and the government is confident the national research council, working in conjunction with the provinces and the universities, will accomplish notable work in connection with the economic development of Canada.

PLANS SPEAKING TOUR

Hon. R. B. Bennett, leader of the Federal Conservative Party, who is planning an extensive speaking tour of the Dominion. This picture was taken just at the end of the session.

Imitation Strike At Antwerp Made Real

Dock Workers Turned Joke Into Real Thing

Antwerp, Belgium.—An imitation strike turned out to be a real one, with 11,000 dock workers calling in work in the harbor of Antwerp and refusing to listen to the pleas of the shippers to return to their jobs. The affair started out as a joke.

Two Communists bicycled around the harbor, telling the surprised dockers that the union had declared a strike to get a raise of 10 francs (40 cents) a day. The union officials immediately decided to make the strike a real thing.

Refuses a Peerage

Retiring Speaker Of British House Of Commons Does Not Desire Title

London.—Right Hon. J. R. Whitley, who retired last week from the speakership of the House of Commons, has intimated to the government that for personal reasons he does not desire to accept the peerage which it is customary to confer upon speakers on their retirement.

His refusal breaks a precedent which has been maintained for more than 120 years. Out of ten speakers of the House of Commons who have been created viscounts, seven have been created viscounts.

LAKE DROPPED TWO INCHES

An excellent official opening of the western lakes and rivers was made this spring when several guests of the Banff Springs Hotel commended a big motor bus, for the five-mile journey to Lake Minnewanka where several good catches were made.

The best sport fell to G. Andrews, of Banff, who captured a thirty-pound lake trout after a long struggle. He practically swears that the water dropped two inches when the trout had been landed.

"Big Tim" Murphy Slain

Assaults Use Machine Gun Method To Smash Gang Leader

Chicago.—"Big Tim" Murphy, Chicago labor leader, was shot and killed at his home at 2543 Morse Avenue, in the exclusive Rogers Park district, by assassins who attacked him with machine guns.

An automobile parked on a side street a few hundred yards away threw its glare of lamps on the labor leader as he stepped from the basement doorway, his silhouette reflected by the basement lights.

In response to a call, "Who is there?" Big Tim was answered by the rat-a-tat-tat of a machine gun. He fell into the area-way, his brother-in-law grabbing his body and dragging it into the bungalow dining room.

Mrs. Murphy returned home as the brother-in-law, Harry Diggs, brought her husband's body into the room. The former state representative and labor leader apparently was in the direct line of fire from the machine gun. Diggs escaped injury. Diggs said he saw "four or five men in a big automobile."

A neighbor said he at first thought the firing was some kind of a premature Fourth of July celebration until he learned that Big Tim was shot.

May Merge Wireless and Cable Interests

Report Of Pacific Cable Conference Is Awaited

London.—The Evening Standard said that it understood an announcement was expected immediately to the effect that the government would approve a merger of wireless and cable interests. Consequently, Marconi stock rose a dollar a share on the stock exchange, and shares of Eastern Telegraphs rose also.

Pending report of the Pacific Cable Conference which has been meeting in London for some time, rumors have been spread of a huge merger of existing cable and wireless companies to take over from the various governments of the Empire the present system of Imperial communications. Canada is interested as a part operator of the Pacific cable system, the revenue from which has in recent years been unsatisfactory.

INFLUENCE OF WHEAT POOL ON WORLD MARKETS

Edmonton.—Tales of the success of producer co-operative livestock associations in the United States were unfolded before the Institute of Co-operation here by C. G. Randall, of the U.S. Department of Agriculture's division of co-operative marketing, Washington.

"Bigger and better livestock co-operation" was the topic of Mr. Randall. He outlined the progress of farmer co-operatives in the U.S., stating that their turnover last year exceeded two and a half millions.

Mr. Randall gave six reasons for success, guide posts to new standards of efficiency on the part of co-operatives; capable and efficient managers and employees; able and working board of directors; well informed active and supporting membership; proper financing and facilities for doing business; volume of livestock sufficient for economic operation; working program, embracing perhaps a research department.

"The greater control of our product, the greater control of our price," was the axiom laid down by George McIvor, general sales manager, Canadian Wheat Pools, in an address on "Functions of a Central Selling Agency." He expressed the desire to see every farmer in the West a pool member and was of the opinion that if the pool controlled 75 per cent. of the Canadian wheat crop (it now has 55 per cent.) it would virtually be able to control the Canadian price, having regard to world markets.

He remarked that the total of wheat traded upon the world markets was 800,000,000 bushels, and that the Canadian pools handled 220,000,000 bushels, it could be readily seen what influence it already has on the world market.

"Some problems of management" were dealt with by E. B. Ramsey, of Winnipeg, manager of the Canadian Wheat Pool.

"There is no trick of management that can make up for a badly informed and dissatisfied membership," said Mr. Ramsey. He added that when a commercial concern failed, it was soon forgotten, while every co-operative that failed struck a blow at world co-operation.

BRITISH LABOR PARTY OPPOSES LARGE PENSION

London.—The customary pension of \$20,000 annually for retired speakers of the House of Commons was attacked in the House by the Labor Party, when Premier Stanley Baldwin moved a resolution granting the annuity to Rt. Hon. J. H. Whitley.

The official Labor Party amendment moved by Rt. Hon. J. R. Clynes would have made the pension \$5,000, but it was defeated by a vote of 224 against 103.

The resolution favoring the customary pension was then passed.

Mr. Clynes emphasized that the Labor amendment was not any attempt to minimize the value of Hon. Whitley's services as a speaker. He thought there existed a real case for revision of the emoluments attached to the speakership, in view of the heavy expenses in connection with the office. He proposed, however, that the pension of \$20,000 was unjustifiable.

Rt. Hon. Ian MacPherson on behalf of the Liberals supported the amount of the pension which he considered might be regarded as "deferred salary."

After a few speeches by Labor members the premier intervened and appealed for an early decision without further discussion. He fully accepted the fact that reduction was moved on principle, but pointed out that the speaker, in view of the fact, was absolutely debared from entering any business or seeking his own fortune.

The value of the pension today was much smaller than formerly, he added.

Jack Jones, Labor member from Silvertown, promptly offered to retire on pension of even \$5,000 immediately.

Working For Disarmament

League Of Nations Has Made No Progress This Year

Geneva.—A last effort to accomplish something tangible toward disarmament before the League of Nations' annual assembly convenes in September has been begun by the League's security and arbitration committee.

No secret was made of the committee's belief that 1925, which was to be a banner year in disarmament work, has developed nothing to date.

The committee hoped to draft model security treaties for submission to the assembly as a basis for eventual agreement. It had been admitted that a group of European nations will not disarm themselves until such security treaties have been effected—guaranteeing them against possibility of attack.

As a result, six model treaties of various sorts were drafted. The commission at its present meeting hopes to draft model treaties in their final form and submit them to the League for approval and action.

To Consider Kellogg Note

Japan Approves Of Latest Proposal To Outlaw War

Tokio.—The foreign office spokesman says that Japan was in complete accord with the latest proposal of Frank B. Kellogg, United States Secretary of State, for treaty to outlaw war. The cabinet was expected to meet soon, to consider the Kellogg draft, after which a reply would be sent. The spokesman said the government believed the proposed treaty did more to ensure the peace of the world than any similar document in history.

Registration Cancelled

Panama.—Treasury officials have announced that the registration of all ships flying the Panamanian flag which were found engaged in smuggling liquor or contraband into the U.S. had been cancelled. The ships affected were the Federal Ship, of Vancouver, B.C., which was seized more than a year ago by prohibition authorities on the West Coast of the U.S. and later released by court order, and the Chama and the Hakada.

Ambitious Project Planned

Regina, Sask.—According to a news despatch carried by a local newspaper, a move is being made at Lethbridge, Alta., to pipe gas from the main field at Alberta to Moose Jaw, Regina, Brandon and Winnipeg. No names are divulged, but it is alleged that a bond issue will be floated in New York to obtain the necessary financial backing.

Are You Lazy or Indifferent?

It is the easiest thing in the world to become lazy. Some are born tired, without a doubt—at least they give that impression as they proceed or drift on through life—others allow the lazy habit or indifference to take hold of them because they do not accomplish results as quickly as they desire.

Some become indifferent because they receive a setback to their worthy ambitions, and allow discouragement to take hold instead of taking up the tussle anew with life and its ever varying problems. Some are possessed of mental inertia and are quite content to let others do the thinking and providing for them; consequently there is always the vast army of the mediocre.

Ask a lazy man to do something in the way of voluntary service and invariably he will reply that he hasn't the time. On the other hand the busy man will make time if he sees that his time is to be used to advantage. To make a success of business, no matter if it be large or small, requires initiative. You may not be brilliant, but often the exercise of persistency and faithful performance of the daily round of duties will accomplish far more than the spasmodic effort which is followed by a lazy spell, or as some term it, resting on their oars.

Making a Home

At one time the thought quite prevalent in people's minds on coming to Western Canada was that it was merely a place to live in for a few years and then pass on or return whence they came. There may have been reason for this attitude when the country was in the making, and pioneer life and its hardships made people yearn for some of the comforts they enjoyed in the homes they left. Such a condition does not exist, generally speaking, at the present stage. Homes in most western towns can now by the enterprise of the individual be made quite as comfortable and attractive as those of the larger cities, in fact there are advantages very much in favor of the smaller centres as against the cities.

The happiness one may derive from a home depends almost entirely on the individual. If he regards it as merely a place for eating and sleeping, instead of regarding it as his castle, no matter how humble it may be, then he has only himself to blame if home does not hold the attractions it rightly should.

True, many of our western towns have, like Topsy, just "grewed up," and do not present an inviting appearance, but these are physical defects which man's enterprise can easily overcome if he makes up his mind to.

By putting enthusiasm into your daily work, no matter if it be manual labor or work requiring scientific skill and the exercise of the brain, helps to lighten the task and make that easy which otherwise would seem hard to perform,

Enterprise Consolidated

Mining Company, Limited

FOUR UNITS PRODUCING
GOLD, SILVER, LEAD & ZINC ORES.

This Company which includes the following Mines, Yankee Girl, Goodenough-Ymir, Mother Lode & Nugget, and Enterprise, is located in the rich Slocan and Kootenay Lake District, British Columbia.

Comprehensive development plans are now under way for these mines.

We recommend Enterprise Consolidated as an outstanding speculative investment of the present era of tremendous development in British Columbia.

NAME.....

ADDRESS.....

Here and There

(89)
Half a million automobiles from the United States and the provinces of Canada, carrying a million and a half persons, will enter Montreal during the coming tourist season, according to the estimate of the Montreal Tourist and Convention Bureau.

The use of the combine is expected to be more general than ever in the 1928 harvest. In 1924 there were 176 combines in the Prairie Provinces, 148 in Saskatchewan, 26 in Alberta and 2 in Manitoba. In 1927 there was a total of 630 in Saskatchewan, 221 in Alberta and 23 in Manitoba, 774 in all.

There is considerable tree planting activity along the Medicine Hat division of the Canadian Pacific Railway. At Shackleton along twenty-five bundles of small trees were received the other day from the Forestry Branch at Indian Head, Saskatchewan, and all are now planted. Cluny and other villages are competing actively.

Equaling the speed across the Atlantic ocean made by passenger liners of medium size, the first 10,000 ton vessels of the "Beaver" class have been achieving records in oceanic freight transportation for the Canadian Pacific Steamships. The speedy quietest of freighters joined the company's fleet this year and have been running on as frequent and rapid a service between Canada and Europe as many passenger boats.

Chicago. — "Smiling Billy Hogan," veteran C.P.R. conductor, took "The Mountaineer," Canadian Pacific flyer from Chicago to Vancouver out in its initial run of the season this year. The train is one of the "Big Five" C.P.R. trains de Lux operating from Chicago and the east of Canada across the continent during the summer. Conductor Hogan joined the "Boo" line in 1888 as stoker on the old Winnipeg Railway, and is to-day one of the veterans of the company.

Montreal. — A new era in Canadian trans-Atlantic passenger history has been inaugurated in Montreal, where the fine new liner "Duchess of Bedford" docked recently. The new 30,000 ton vessel, the largest to ascend the St. Lawrence to Montreal, is the first of our cabin class sister ships of the new "Duchess" type, which will supplement the Canadian Pacific's trans-Atlantic and winter cruise services. Speakers at the banquet held on board on arrival in Montreal after her maiden voyage celebrated the occasion as an event of national significance.

The Feast of St. John the Baptist, greatest of French Canadian religious spectacles, will be celebrated throughout the province of Quebec shortly. The Montreal baseball stadium, which will accommodate 25,000 persons, will be crowded by spectators of a French Canadian oratorio, to be followed by a spectacular fireworks display. On the Sunday afternoon, thirty boats, depicting French Canadian songs, many bands, and over 10,000 singers and minstrels, will come together in a procession several miles long through the streets of Montreal.

Antrobus' Sell Good Shoes

There are
Two Sides
to this
Story

MOST people think of their Chevrolet dealer as a NEW CAR dealer... partly because of the large number of new Chevrolets which they see on the streets. But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only one side of his activities. He must not only sell cars but he must also exchange them.

Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer. From his experience in selling Chevrolet cars, he knows motor-car values. He knows that it is just as important for him to sell a Used Car as a new car. He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers. He knows that satisfied Used Car owners will eventually become prospects for new cars. He knows the value of good-will.

In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here.

The United Church

The Patriotic Service postponed from last Sunday will be held on Sunday morning next. The weather prevented all but a small part of the Church school being present. The special leaflets will be used and the service will be attended by

the school as well as the adult congregation.

In spite of the rain there was an excellent turnout to hear Rev. Mr. Konkle, Gen. Sec., to the Canadian Mission to lepers. The evening service was also well attended.

Antrobus' Sell Good Shoes

C. G. I. T. Camp

Owing to the very unsettled weather it was found necessary to abandon the arrangements for the Lee Lake Camp.

If the weather improves a small camp will be arranged for the local girls, possibly at Crow's Nest Lake. This will depend upon weather conditions.

JOCK AFTER CHAMPIONSHIP

Quoit throwers of Alberta meet in Calgary this week to play in Western Canada championship games. The sole representative from Coleman this year is Jock Bell, who is making a try to land the silver quito and the honor that goes with it. Coleman has usually had a good team, and in the past has achieved a good record.

Coleman Won on Monday

Monday was Coleman's Day! At Blairmore in the first aid competitions the girls team under Mrs. A. Lonsbury won the first prize, also the boys team won prizes of gold watches and belts. Further details of the competition will be given next week.

In the afternoon at Coleman the home team put it over Hillcrest football team by a score of 6-2, and to cap the day a Coleman boy, named Corrigan, employed at the O. P. R. depot, won the grand prize of a Chevrolet Sedan at the Blairmore carnival, his investment being a 25c ticket.

ADDITIONAL PRIZES

Further contributions to the prize list of the Rod and Gun Club are acknowledged from the following:

J. Michalsky, fruit, value \$5.00
Lecky, Leduc & Co., ham value \$5.00
Albert Sapeta, cash 1.00

This makes the total received of \$7.25, and the executive committee of the club has arranged that they be distributed evenly for the three club competitions to be held during the summer.

Last Sunday's competition was cancelled owing to the rain, and the new date will be announced by the secretary, J. Rushton.

Vancouver.—"Maizie," the famous white Leghorn hen owned by the University of British Columbia farm, officially known as Hen No. 6, the world's champion layer with 361 eggs in a year, is proving a substantial revenue producer for the University of British Columbia. Last year the sale of pedigreed poultry stock from Maizie returned to the University \$2,225. Two of her cockerels fetched \$500 each when sold to Ohio poultry raisers, while another cockerel sold in New Jersey for \$300. The University receipts on sale of pedigreed British Columbia stock totalled \$7,225 for the year.

IT PAYS TO ADVERTISE
Ed. Leduc states that it pays to advertise, for he sold out his stock of reversible rugs advertised last week. Advertising in the local newspaper brings results, and people very quickly take advantage of special offers when they are properly advertised.

125 Times Around the World

IN pursuing its policy of consistent progress—in its continual search for new ideas . . . in its constant development of better cars . . . General Motors not only maintains its great International Research Laboratories and hundreds of skilled engineers, but also operates the first, largest and most completely equipped automobile proving ground in the world.

Here, on the vast fourteen-hundred-acre tract of the General Motors International Proving Ground, every type of road is duplicated, every condition of driving is

reproduced. Here all makes of General Motors cars are constantly being subjected to the most searching tests. Here every principle developed by General Motors engineers is put to proof . . . every detail of each test car's performance carefully and closely checked. Here years of normal use are crowded into a few months of continuous, grueling operation.

A typical example is offered by Chevrolet. Since the opening of the General Motors Proving Ground, Chevrolet cars alone have piled up over three million miles of

testing . . . a distance equal to 125 times around the world.

In the countless millions of miles that General Motors cars have covered on the General Motors Proving Ground, there has been one great purpose kept in view . . . to improve, by constant testing, the quality and worth of every General Motors product.

Every Canadian buyer of a General Motors car gets a car built in Canada by Canadians to meet Canadian conditions of road and climate . . . a better car and a greater value because General Motors uses so freely and unspareingly its unequalled facilities for testing and research . . . With better General Motors cars at the end of the journey, millions of miles is not too far to go.

England's most picturesque visitor, Sir Offir Alta, blue-black potentate of Akim Abusheba, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of \$100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward, it is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled \$12,762, compared with \$13,793 in 1929. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Notes

The distance to which a man's voice will carry depends upon many different circumstances. The condition of the atmosphere is one—damp will slow down the sound-waves, while a dry, crisp air will forward them easily. Wind is another factor—so is the height of the speaker in regard to the number of objects, rocks and so on in front of him. The number of competing notes also has to be considered. Under ordinary circumstances, few voices will carry intelligibly much over a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance a voice will carry for over a mile. And a song, as rendered from a mountain top, was once heard at a distance of four miles.

Question of Relationship

In a recent court case at Toronto, a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No. I said he was my husband's sister's husband's brother!" The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties; a shop assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably so called because they are not accustomed to fire.

Mistress: "Is there anything we require from town?"

Maid: "Yes, the china will not last us over Sunday,"—Kasper, Stockholm.

W. N. U. 1740

Farmers' Marketing Tour

Canadian National Railway Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us the following day when as guests of the Port of London Authority, we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the value of imports and exports passed through the port in 1928 totalled in value \$3,500,000,000 and included 55,000,000 bushels of wheat. In the same year 50,000,000 tons net register of shipping entered and left the port. Walking through one set of showrooms, ten acres in extent, we visited the Ivory Room, where we were introduced to see a perfect specimen of pre-historic mammoth tusks 11 feet long, weighing 185 pounds and containing an estimated age of 56,000 years. In the State Room \$25,000 worth of paper was stored, and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of bales of Canadian wool stores in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Iodine Room, holding 25,000 small hide-bound kegs of iodine, every one worth \$500. The hide is necessary because of the rotting effect of iodine which destroys the wooden kegs in a comparatively short space of time.

But the thrill of the day came when we were taken to a port and seeing an estimated age of 56,000 years. In the State Room \$25,000 worth of paper was stored, and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of bales of Canadian wool stores in a single year nearly 2,000,000 bales.

Again in the open air we boarded a launch en route to the S.S. Minnow, where we were taken to see the guests of the Port, under the chairmanship of Lord Ritchie of Dundee. The party was taken to this beautiful ship, surrounded by great liners from almost every country in the world made a deep impression. This was followed by a river trip back to London.

In the evening we were the guests of the Empire Marketing Board at a dinner at the Park Hotel and had an opportunity to see the first hand the valuable work being done by this organization to encourage the consumption of products produced within the Empire. The sum of five million dollars was further placed at its disposal by Parliament to further the marketing of Empire products. The board is a non-party body and includes representatives of the Dominions and Colonies. Agriculture was an important phase of its work. The chairman, on the occasion of our visit, was Lord Lewis of Dudley, Under-Secretary of States for the Dominions, who is something of the work of the Board, which is headed by Sir Halford Mackinder, President of the Imperial Economic Committee.

The next day of the programme provided one of the most interesting mornings of our stay in London, a morning visit to the Tower, a grim fortress which we entered by the drawbridge, for here and on Tower Hill perished some of the most renowned men and women of the world. The beautiful Anne Boleyn was beheaded; and here Lady Jane Grey saw that she was to die. The Tower was carried past her on the morning when she knew that she was to die. It is Sir Thomas More it came, Sir Walter Raleigh and his tragic fate, and though these things happened in the days gone by, one feels the Tower to be sinister still. Even in our own time it is not chosen as the place in which the spies in the Great War should meet their doom.

We were admitted by Yeoman of the Guard "Redcoats" who still wear the quaint uniform which was adopted in the time of Henry VII. We were shown the Bloody Tower where the bones of the two missing Princes were found and the room, (reconstructed), in which Sir Walter Raleigh, when a prisoner wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too, were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the block and execution axes, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to Sir Thomas More it came, we saw the cloak on which Wolfe died on the Heights of Abraham.

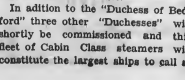

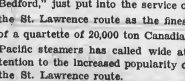

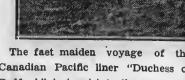

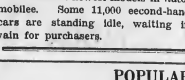

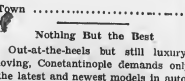

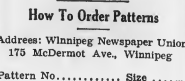

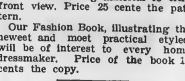

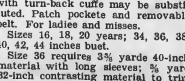

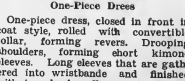

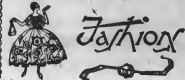

Many quaint forms are still retained in the administration of the Tower. The gates are shut to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts—without giving the password.

In one of the strong rooms of the Tower there repose three Crown Jewels, including the crowns of King George and Queen Mary, a display of treasure which amazed us.

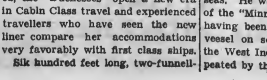

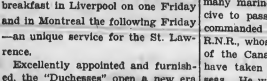

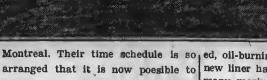

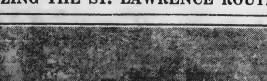

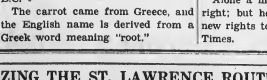

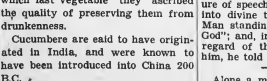

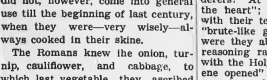

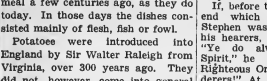

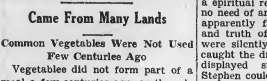

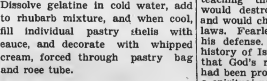

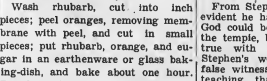

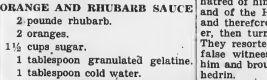

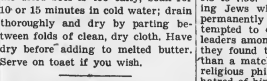

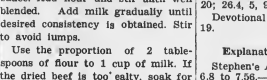

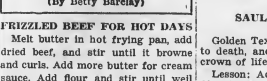

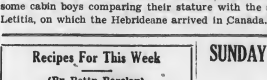

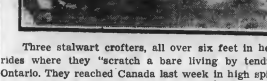

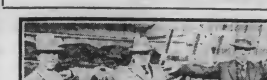

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tower

is the portcullis, said to be the oldest one in existence in working order. On our way to the Tower we stopped at St. Paul's Cathedral, Sir Christopher Wren's masterpiece, but, owing to the gouting operations on the piers which support the great dome it was not possible to see its interior to advantage, most of it being boarded up and inaccessible. We did not see the crypt or enter the Whispering Gallery. (To Be Continued.)

STALWART HEBREDEANS

Canada's Flying Clubs

Eleven Already Established and Two More Being Organized

Hon. J. L. Ralston, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.

Canada now has 11 light aeroplane clubs, extending from Granby, Que., to Victoria, B.C., with ten others in process of formation. Fourteen "moth" planes have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby club, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

Clubs in process of organization are located at: Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walkerville, Ont.

Alberta Act Invalid

Privy Council Upholds Ruling of Supreme Court of Canada

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from a Canadian Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the Judicial committee of the Privy Council. The decision invalidated the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, certain of the property goes to the University of Alberta.

Receives Large Salary

Chief Harpooner Earned \$39,000 in Nine Months' Whale Hunt

Few occupations tax the services of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Antarctic after a nine-months' cruise, the chief harpooner had earned a "normal" income of \$33,000. In addition to this sum he had a contract granting him \$20 for each whale he killed. During the nine months he killed 300 whales, and his extra income amounted to \$6,000. Hardly one man in a thousand may hope to be a really good harpooner. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

Changes Name Again

Feking Will Be Known As Feping Meaning "Northern Fence"

The national government political council has decided to change the name of the historic Manchurian capital, Peking, to Feping, meaning "Northern Fence."

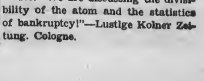

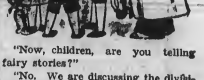

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

Should Be Popular

Aerial tea parties every Friday afternoon throughout the summer have been arranged by the Imperial Airways to enable Londoners and visitors to see the Metropolis from the air. A big 21-seater aeroplane will cruise above London for about 30 or 40 minutes, and tea will be served.

Now, children, are you telling your mother that you are not interested in the story of the sinking of the Titanic? No, you are discussing the divinity of the atom and the statistics of bankruptcy!—Lustige Kolner Zeitung, Cologne.

Recipes For This Week

(By Betty Barclay)

FRIZZLED BEEF FOR HOT DAYS

Melt butter in hot frying pan, add dried beef, and stir until it browns and curls. Add more butter for cream sauce. Add flour and stir until well blended. Add milk gradually until desired consistency is obtained. Stir to avoid lumps.

Use the proportion of 2 tablespoons of flour to 1 cup of milk. If the dried beef is too salty, soak for 10 or 15 minutes in cold water; drain thoroughly and dry by patting between folds of clean, dry cloth. Have dry beef before adding to melted butter. Serve on toast if you wish.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.
2 oranges.
1½ cups sugar.

1 tablespoon granulated gelatin.

1 tablespoon cold water.

Wash rhubarb, cut into inch pieces; peel oranges, removing membrane with peeler, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour.

Dissolve gelatin in cold water, add to rhubarb mixture, and when cool, fill individual pastry shells with sauce and decorate with whipped cream, forced through pastry bag and rose tube.

Came From Many Lands

Common Vegetables Were Not Used Few Centuries Ago

Vegetable did not form part of a meal a few centuries ago, as they do today. In those days the dishes consisted mainly of meat, fish or fowl.

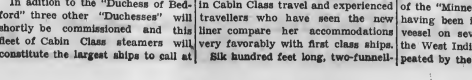

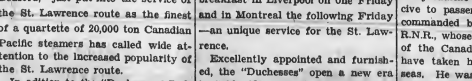

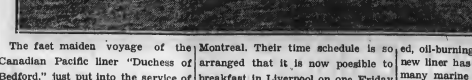

Potatoes were introduced into England by Sir Walter Raleigh from Virginia, over 300 years ago. They did not, however, come into general use till the beginning of last century, when they were—very wisely—always cooked in their skins.

The Romans knew the onion, turnip, cauliflower, and cabbage, to which last vegetable they ascribed the quality of preserving them from drunkenness.

Cucumbers are said to have originated in India, and were known to have been introduced into China 200 B.C.

The carrot came from Greece, and the English name is derived from a Greek word meaning "root."

POPULARIZING THE ST. LAWRENCE ROUTE

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Philip Milk of Magnesia—a tasteless dose of water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quickest method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Philip Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PAINTED FIRES

—BY—

NELLIE L. MCCLUNE

Copyright, Canada, 1925

CHAPTER XXVI.—Continued.

The next day Helmi went to the North Star Rooming House, walking wearily up the stairs to No. 19.

Mrs. Corbett opened the door to her as she had four months before, and again the anguish in the girl's face told her old story.

"My God! Helmi, is she dead?" asked Mrs. Corbett.

Helmi sat down before she answered.

"Is that all? Sure that's nothing," every child takes scarlet fever. They're grand at the Isolation Hospital. I've got Miss Shaw up there, as grand a girl as ever went on rubber heels. Cheer up, Helmi, the little pet will be all right, please God. I thought the gypsies had stolen her by the look on your face, and I'm glad it's nothing worse than scarlet fever."

"My man has gone to the war!" said Helmi brokenly; "I saw him on the train. He did not see me—he does not care about me."

Mrs. Corbett paused. This was a harder complication than the illness of little Lili, and for a moment even this determined optimist was flustered—but only for a moment.

"Well, sure, when he's there you know where he is, and it's noble of him to go, Helmi—remember that. Now here, dear, take a cup of tea. Yes you can; a person can always take a cup of tea, no matter who's gone, and it makes life look a little brighter. Drink it down, dear, and have another. You look better now. Don't get down to mourning, Helmi; there's nothing happened yet that can't come right, remember that, and your darlin', blessed child with God's blessing, will come through the fever just the way we all did, and your man will come back again."

"But he doesn't want my money," Helmi said. "I know now. The magistrate has turned him against me. I said I would kill that man, and I will."

"No, dear, no; you mustn't talk of killing anyone. God will deal with wicked in His own good way. You come with me to the Army and you'll find comfort in God's love. No killing, though, Helmi, that's bad. And see, dear, I was forgotten there's two letters for you—just came yesterday."

Helmi took them eagerly and opened one. "It's a mistake," she said, listlessly. "See, there's money in it. No one would send me money. It has been opened too, and sealed up again."

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She was working out now in a store and walks three miles every morning and bathes in the evening."—Mrs. Mary Vance, 44 Langes Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year old girl."—Mrs. Almasa Duce, Latta, Pinewood, Ontario.

W. N. U. 1740

and some one to spend his money, but—

In some ways he had been to blame—he had been too easy, indulgent and foolish. Eva and her friends laughed at him, he knew. The ease with which Eva was able to decide him furnished many a good story for the lively company which sat at the bridge tables.

It was when his mother came to visit him a year ago that the doctor began to see Eva as she was. He had tried to imagine what she would be like when she was as old as his mother, who at sixty-five was as alert and eager-minded as ever, doing many of the things she had wanted to do all her life. To Eva she was a puzzle. How could anyone get such joy from going to the New Year Rally of Sunday School Children? Or why did anyone get up early on Sunday morning to go for a walk? Eva's studied politeness toward his mother irritated him, and it was a relief when his mother went over to Miss Abbie's to finish her visit. She passed another day. He had so often thought of what a pleasure it would be to have his mother visit him. She was such a good sport, his mother.

Another matter was weighing heavily on the doctor's mind. More surgeons were needed at the front. Why should he stay here at ease?

Dr. Brown, his young partner was seriously considering the matter. Dr. Brown had a wife and children—a wife who loved him. Dr. Brown had the younger man. That did not matter. Dr. Brown needed more money. He had no one depending on him. Eva would be happier with him so long as the money held out.

These thoughts occupied the doctor's mind as he lay listening to the commotion across the hall. The first year of their married life, when he began to see that Eva had no intention of entering into his life seriously, he was sorry that he had dreamed of domestic happiness since he was sixteen, and it is the loss of a dream that hurts most. Now he was still hurt, and it was critical. When criticism begins to fill the mind the tenderness of love is over.

(To Be Continued.)

Heart Not Automatic Pump

Simply Controls Flow Of Blood Says German Specialist

The heart is not an automatic pump sending blood to all parts of the body, as generally believed, says Dr. Mendelssohn, a famous heart specialist of Germany. The organ, he says, is simply a governor to control the orderly flow of the blood, this current being due to the constant outgo and intake of liquid caused by chemical action in the body cells. His further deduction is that the heart, a small muscle the size of a man's fist, "could not possibly be capable of driving the tremendous mass of blood through the entire body."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eucalypti Extract. Its analgesic and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Most Sensitive Device

Valuable Information On Blood Circulation Gained Through "Geiger Counter"

The "Geiger Counter" is an exceptionally sensitive device which is able by means of ionization produced to count the electrons which may enter it from any cause. It can be attached to a loudspeaker of conventional type and a loud noise will be heard as each electron enters. A use of it almost as spectacular as the use of the Geiger Counter is the instrument made by Dr. H. C. Blumgart, of the Boston City Hospital. Dr. Blumgart injects an infinitesimal quantity of radio-active material into the arm of a patient, and with this material he measures the time for this material to be carried back to the heart and to the arm. He thus obtains valuable information on blood circulation.

Had New System

Employer: "I trust you are not the kind of workman who drops his tools and runs when the whistle blows."

Applicant: "Oh, go on. I always have my tools packed away long before the whistle blows."

An Old Superstition

Two persons who were their hands in the same water, or who dry their hands on the same towel are likely to go begging together, Sussex folk will tell you; but in the north of England, they say to do this signals a quarrel.

Take Census Of Animals

National Park At Jasper Teaming With Wild Life

A census has been taken of the wild animals in Jasper Park, which constitutes a sanctuary for wild life over 5,000 square miles in extent.

Park wardens for some years periodically estimated the numbers of the large wild animals in Canada's national parks. Heading the list at Jasper Park, there are, according to approximate estimates, some 15,000 caribou and grizzly bears. For the smaller animals no figures are available, but there are large numbers of beaver, otter, fisher, marten, mink, muskrats and porcupines.

The wild life of Jasper Park is indicative of what may be found in the other great Canadian national parks of the Rockies, Banff, Yoho, Kootenay and Waterton. Together, they measure close to 10,000 square miles, an area of mountain scenery and protected wild life two-thirds as great as all Switzerland, and almost as large as Belgium.

Royal Air Force Band

Will Be Heard At Western Points During the Summer Months

The band of the Royal Air Force, now on a three months' tour of Canada and an engagement at the Canadian National Exhibition at Toronto, is the youngest among the first-class bodies of military musicians in Britain.

The band, under the leadership of Flight-Lieutenant Amer, will play for a week at the fairs at Brandon, Man., Calgary and Edmonton, Alta., Saskatoon and Regina, Sask., and for two weeks at the exhibition at Toronto, Ont., in August. In the interval between the western fairs and the opening of the Canadian National exhibition, the organization will give concerts at Victoria and Vancouver, B.C.; Seattle, Wash.; Lehighridge, Alta.; and Winnipeg, Man., as well as other cities, and finally will play Montreal and Quebec.

Mittler's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been used successfully for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Little things frequently annoy a man—small boarding-house streaks, for instance.

Eczema Formed Painful Blisters Cuticura Healed

"Eczema started with a fine rash on my arms. Later it formed blisters and the skin of a bean which was full of water and very painful. It burned and was so sore I could not bear to touch it. The weight of a cup in my hand would fairly make me cry out with pain. I had my hands and arms tied up from the soles of my fingers to my shoulders. Sometimes I looked at my arms for hours."

A friend recommended Cuticura Soap and Ointment so I sent for a trial sample. I purchased more, and about two weeks' use was made. (Signed) Miss Emily B. Davis, R. R. 3, Northwood, Ont.

Keep your skin clear by using Cuticura Soap Ointment and Talcum for daily toilet purposes. Touch up your face by using Cuticura Soap and Ointment, baths with Cuticura Soap and hot water.

Small bottles of Cuticura Soap and Ointment 25c. Cuticura Shaving Stick 25c.

Believe It Or Not

Electric Light Burned Unseen In Scotland For Twenty-Two Years

How a light in an unknown room in a theatre at Glasgow, Scotland, burned unseen for 22 years, has just been reported. When electrical engineers were asked to give quotations on overhauling the lighting system a certain line of conduit disappeared in a wall, and the trail ended. Nearby was a locked door, the key to which had been lost. No one from the manager to the call boy could remember the door had ever been opened. It was forced. The unknown room had been used by billposters, and according to a poster lying there the place had not been used since 1906. A 16-candle-power carbon lamp was burning brightly just as it had been burning bent left by the last occupant of the room. The report adds that when the manager estimated the cost of the wasted light, it was 60 watts for 22 years he failed.

Arresting Decay In Wood

New Treatment Being Used May Make It Imperishable

A new tool has been invented for the purpose of giving logs a "hypodermic injection" to preserve them. The tool is a scientific machine being used to inject into telegraph poles a spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life. This treatment of wood is a step that may lead to the complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of steel, brick, or stone. The effect will be much less. The effect will be that of transmitting wood into rock.

Baby's Own TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a positive, but not a gripe. They are soothing, but do not contain one particle of opiate or other ingredient that might do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, loosen constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation which causes the cutting of teeth. They quiet the nerves and promote health-giving sleep and rest. In fact, they are as good as a doctor in the home, and are a mother's best friend for her little child. She will use nothing else. Thousands of mothers bear testimony to the fact that Baby's Own Tablets, by Dr. Williams' Medicine Co., Brockville, Ont., are a tried and true remedy for all little ones and said she could not do without them. After using them for many years, she quite agrees with them and certainly think they are the finest medicine in the world for little children.

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Canadian Dental Society

As a child, you may have thought a tooth solid through just as a piece of ivory which it resembled. When something went wrong with the "tooth," it hurt a little, but this soon passed away.

So you kept "mum" for fear you would have to go to the dentist. Until, one night you awakened your parents with crying and announced between sobs that your tooth was "hurting."

Now, what had happened? Within each tooth is a chamber that is filled with soft tissue-blood vessels and nerves, and the decay which is a disease process had been steadily progressing towards the "inside" until the soft tissue had become infected by the disease bearing organisms. Then nature had rushed to the defense to combat them by sending in to the tooth a greater supply of blood, containing millions of little warriors called "phagocytes." Some of these burst through the vessel walls to attack the organisms and with this increase of blood there was a swelling of the tissue, causing increased pressure on the nerve and pain—which signalled to heading quarters—and so pain resulted.

And, just as in battle, as the fight wages, the wires grow hotter—so the nerves grow more fiercely, crying out loudly—until, by and by the fight was over and the wires cooled off. The tooth was still—dead. You were so glad that it was over, that you forgot to wonder how it stopped.

Edmonton Canning Factory

Edmonton's newest industry, the Broder canning factory, has started operations with 75 persons on the payroll. This is the first industry of this nature in Alberta.

Two copies of every act of the British Parliament are printed on vellum. One, endorsed with the royal seal, is kept among the rolls; the other goes to the record office.

Don't Make a Toy Out of Baby—Babies Have Nerves

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of amiable toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with a few drops of pure, harmless Castoria. It is amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opium. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 20 million bottles used a year show its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Personal and Local

Robert Easton left last week on a visit to Drumheller.

Miss Edith Haysom of the Central school staff left on Saturday to spend her vacation at Vancouver.

Nora Easton, while playing with other children, received a nasty cut in her foot, necessitating several stitches.

Miss Christie Allan of Central school is spending her vacation at her home at Westlock, Alta.

Mr. W. E. Cartwright, of Calgary, is a visitor in town, the guest of his sister, Mrs. A. D. Currie.

Miss Florence Cox, teacher, left for her home at Pincher Creek last Thursday, and will spend part of the holidays at Wayne and Calgary.

Mr. and Mrs. J. Rogers Sr. left on Monday morning for a month's holiday with their son at Arrow Lakes, B.C.

Sidney White came home on Sunday from near Hanna, Alta., where he has been teaching school, to visit his mother.

J. Emmerson left on Saturday morning for a few weeks visit at Portland, Oregon, and other coast cities.

Mr. and Mrs. A. F. Short returned last week from a very pleasant motor tour through the western States, visiting several of the largest cities.

Mrs. Gordon Phillips and children, of Detroit, formerly of Coleman, arrived last week to spend their vacation with her parents Mr. and Mrs. Thos. Breunen.

Roy and Ray Foster have gone to Macleod to spend the summer holidays down on the farm, which will be a pleasant change from school studies.

Mrs. J. Nash entertained last Thursday in honor of her sister, Mrs. A. Easton, who recently arrived from California and is at present visiting with her mother, Mrs. J. Lonsbury.

Walter Bobbitt announces a money saving opportunity at his West Coleman store, whereby 5 per cent discount is allowed on cash purchases, and also on payments of accounts.

Robert Borden arrived home on Monday morning from St. Michael's school, Victoria, to spend the summer vacation with his parents, Dr. and Mrs. Borden.

Miss Aileen James and John James, children of Mr. and Mrs. Gus James, left last Friday to spend their summer holidays at their grandparents' home, Mr. and Mrs. H. James, at Vagovover Island.

Miss Milligan of Central school left on Saturday for her home at Drumheller, and will have as her guest for two weeks Miss Verna McDonald. They will likely leave later for a trip to Jasper Park and the Pacific coast.

Newspaper subscriptions should be paid in advance, and as there are quite a number of subscribers to The Journal who appear to have overlooked this little duty, it is hoped that a reminder will be sufficient.

H. T. Halliwell is attending the annual convention of the Canadian Weekly Newspaper Association, at the Macdonald Hotel, Edmonton, this week. Following the business sessions the members will go to Jasper Park for a three days' visit at the Canadian National Railways resort.

Mr. G. R. Powell left on Sunday night to visit his daughter, Mrs. R. Carson, Winnipeg, and from there will go to St. Paul, to visit two or three weeks with a sister, whom he has not seen for nearly twenty years. During his absence Mrs. Powell will have charge of the jewelry store.

Miss Mercer, Miss Catherine Davidson and Mrs. Muir left on Friday night for Alexo, Alta., and a number of their friends gathered to bid them farewell. They resided for ten years in Coleman, and the good wishes of a large circle of friends and acquaintances follow them to their new home.

The members of the local lodge of the Orange Order with the L. O. B. A., will hold their annual parade to church on Sunday evening. This year they are attending St. Paul's United Church. The public are invited to this service. The time is seven o'clock.

Mr. and Mrs. Hoyle and children left on Friday afternoon on the first leg of a 2500 mile auto tour. Their first point is Edmonton, where Mr. Hoyle will be engaged in marking examination papers for a few days, following which they will proceed south via Calgary and will tour through the western States to the Pacific coast.

Mr. D. McLean went to Nanton last week in response to a message informing him of the serious illness of his father, and on Friday Mrs. McLean received a telegram informing her that he had passed away. He was 75 years of age, and was engaged in the real estate and insurance business for many years. Mrs. McLean left on Saturday to attend the funeral.

High School "Lit." Has Merry Time

(Continued From Page One)

invited the teachers and the board. These were held on Halloween, Christmas week, Easter week and the closing social on Thursday last, and proved to be very enjoyable to all who took part.

The first president of the society was Margaret Halliwell, and on her leaving for Medicine Hat, Adam Wilson was appointed, followed by Idris Haysom. Alex Balloch is the secretary and the executive committee includes Sadie Dickson, Bell Flynn and Mary Barron. They have handled the affairs of the society in a very creditable manner. The fee for members is 25c monthly, which is used to defray expenses of entertainments and socials.

The society not only increases the interest of pupils in the high school, but also has a splendid influence in many ways. The socials provide an opportunity for the older people to become better acquainted with the student body and their teachers, and help to elevate the tone of the high school.

WHEN YOU BUY JEWELRY

You should buy from one who knows the difference between the genuine and the imitation.

Jewelry is not bought very often, and when you do purchase you want the articles of genuine worth. A reputable dealer is your safeguard.

You can rest assured that you get only the best material and workmanship in articles purchased at this jewelry store.
